

Hello Gaminators,

Thank you for taking the time to finish the first assignment.

This is the final assignment for the SQL session of the class.

For this task, you will be fetching some metrics about weekend taxi rides in New York City use this link: <https://www.kaggle.com/datasets/elemento/nyc-yellow-taxi-trip-data> download the dataset and upload it on your Postgresql data base.

Task

Write an SQL query to fetch the following **monthly** metrics from the dataset for the:

- The average number of trips on Saturdays
- The average fare (**fare_amount**) per trip on Saturdays
- The average duration per trip on Saturdays
- The average number of trips on Sundays
- The average fare (**fare_amount**) per trip on Sundays
- The average duration per trip on Sundays

This task will be submitted before the 26th of this month.

This and other assignments will account for a larger part of your assessment.

Have a lovely weekend.
